## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments with respect to claims 1, 4-11, 14-18 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

### ***Claim Rejections - 35 USC § 103***

2. Claims 1, 4, 17-18 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Ito et al. (JP 6-325764, abstract).

Ito et al. teaches a secondary battery comprising a negative electrode made of Al-Si-Fe alloy, a carbonaceous material and a binding agent.

Since Ito et al. teaches the same negative electrode active material comprising an active material alloy containing Al, Si and a transition metal, Fe; a binder and a conductive material, carbon then inherently the same active material alloy having a halo portion observed in an x-ray diffraction profile of the alloy and a degree of non-crystallinity of the alloy of 0.3 must also be obtained.

In addition, the presently claimed property of an active material alloy having a halo portion observed in an x-ray diffraction profile of the alloy and a degree of non-crystallinity of the alloy of 0.3 would have obviously have been present once the Ito et al. product is provided. *In re Best*, 195 USPQ 433 (CCPA 1977).

Art Unit: 1745

In the event any differences can be shown for the product of the product by process claims 1, 4, 17-18, as opposed to the product taught by Ito et al., such differences would have been obvious to one of ordinary skill in the art as a routine modification of the product in the absence of a showing of unexpected results. *In re Thrope* 227 USPQ 964; (Fed. Cir. 1985).

With respect to the product by process claims 1, 4, 17-18, the determination of patentability is based upon the product itself not upon the method of its production. *In re Thrope* 227 USPQ 964; *In re Brown* 173 USPQ 685; *In re Bridgeford* 149 USPQ 55; *In re Wertheim* 191 USPQ 90. Any difference imparted by the product by process limitations would have been obvious to one having ordinary skill in the art at the time the invention was made because where the Examiner has found a substantially similar product as in the applied prior art, the burden of proof is shifted to the Applicants to establish that their product is patentably distinct. *In re Brown* 173 USPQ 685 and *In re Fessmann* 180 USPQ 324.

#### ***Allowable Subject Matter***

3. Claims 8-11, 14-16 are allowed.
4. Claims 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
